

Exkurze do skláren v Poděbradech a nymburského pivovaru se zúčastnil i Onurcan Onurlu

V rámci studijního pobytu AFS studuje na naší škole v tomto pololetí turecký student Onurcan. Se svojí třídou absolvoval v minulém týdnu exkurzi v rámci projektu „Podpora přírodovědného a technického vzdělávání v Pardubickém kraji“. Zde jsou jeho postřehy:

Today we went on an educational trip to a brewery and a glass factory. The tour was held in Czech so I can't say that I understood everything. I saw that making beer is not easy. There are many steps and it's a long process. We saw each and every step and I must say that some parts were very interesting.

After seeing the process of making beer we continued to our next stop: the glass factory. I've been to a glass factory before in my country so it wasn't all new for me. But it was nice to see how things are done here. the factory which I saw in Turkey was much bigger but the process and the way factories work were quite similar. In the end I can say that it was a really nice experience.

Onurcan Onurlu, G3.A
